

# Machine Vision Store

Machine Vision Store has a laser-sharp focus on machine vision imaging. We deliver a select group of components from leading manufacturers known for quality. Components we understand, support and stand behind. Components that will power your success.

Our experienced, AIA Certified Vision Professionals are ready to help you build the optimal imaging system. Contact us for knowledgeable support before and after making your purchase.

**LOW LOW PRICES**

As an authorized volume distributor, we offer the best prices possible. And because we believe in transparency, we publish our prices.

We stock popular cameras, computers, lenses and cables in our own warehouse. For repeat customers, we will inventory exactly what you need to help assure quick deliveries.

## COMPUTERS

- Ideal for image processing
- Fanless industrial designs
- Multiple PoE and USB3 ports

## CAMERAS

- GigE, USB3, CameraLink, HDMI, and Firewire interfaces
- Matrix, linescan, mono, color and NIR sensors

## LENSES

- Every resolution, every size, and nearly every mount
- Ultraviolet, visible, NIR and SWIR wavelengths
- Macro, entocentric, telecentric, pericentric, polyview, cavity and Scheimpflug optics

## LED LIGHTING

- Back, linear, spot, and ring lights
- Diffuse on-axis, diffuse panels, and dome lights
- Infrared to ultraviolet illumination
- 3D pattern projectors

## ACCESSORIES

- Cables
- Filters of every type and size
- Enclosures for cameras, lights and lasers
- Lens holders
- Adjustable brackets

**SYSTEMS** Our AIA Certified Vision Professionals will help you select the best hardware for your unique project. We have a complete imaging lab to test possible configurations. Consider a quality camera precisely matched to a lens and filter, with optimal lighting and processing power, ready to go right out of the box.
