network

Matrox Imaging Milestones

Presence

-  Dorval, Canada
-  Middlesex, United Kingdom
-  Unterhaching, Germany
-  Champlain, United States
-  Cork, Ireland
-  Hong Kong, China
-  Our worldwide network covers over 111 sites

Organizations & Standards

Patents

- Matrox Imaging is focused on distinctive innovation
- The patent portfolio is a reflection of our original workmanship and creative spirit

Software

Systems

Components

Matrox Imaging Library (MIL)

- Comprehensive, hardware-independent SDK for developing machine vision applications
- Includes tools for every step in the process, from application feasibility to prototyping, development, and ultimately deployment
- Proven, 25+ year track record of reducing the time and effort to bring solutions to market

Matrox Imaging Library (MIL)

- Support for analog, Camera Link, CoaXPress, GigE Vision, DisplayPort, HDMI, SDI, and USB3 Vision interfaces
- Program in C/C++, C#, CPython, and Visual Basic languages
- 32-/64-bit Windows and Linux
- Prototype and generate code using MIL CoPilot utility
- Analyze execution performance with Matrox Profiler utility

Matrox Design Assistant

- Powerful, flowchart-based IDE for developing machine vision applications
- Intuitive flowchart eliminates need to write program code
- Based on MIL software
- IDE runs on Windows
- Projects deploy to Matrox Imaging smart camera or vision controller or third-party PC

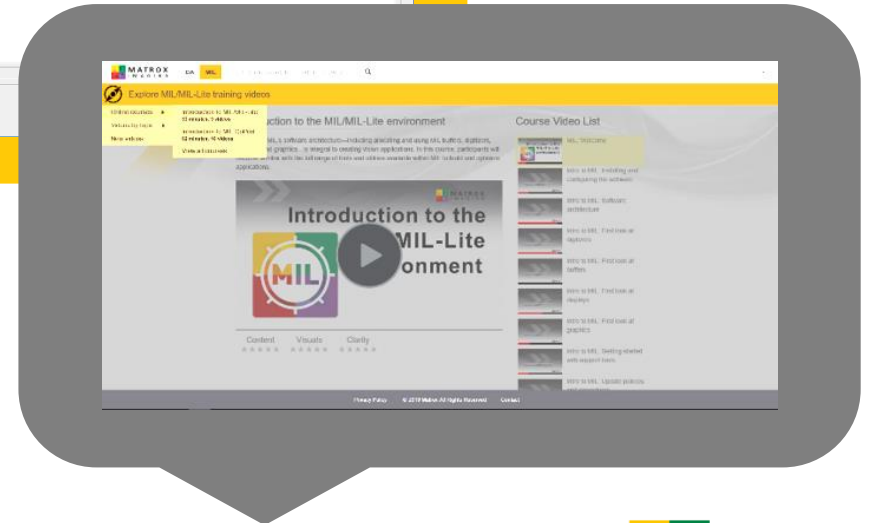

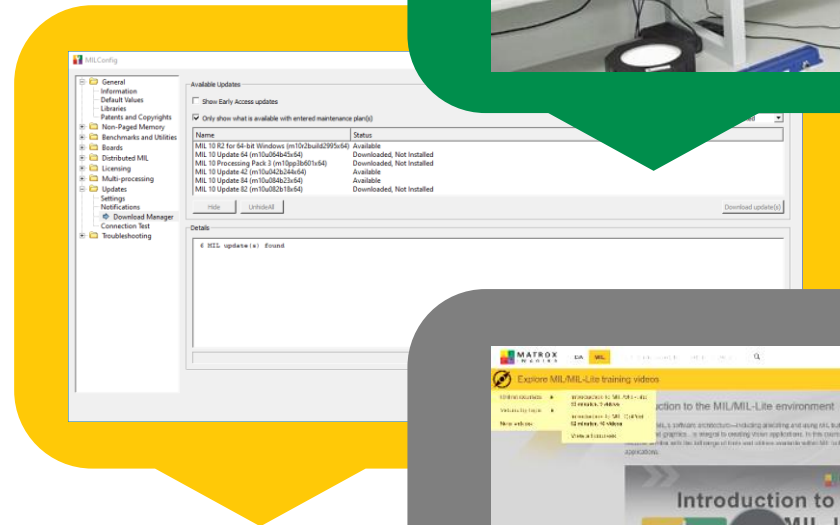

Matrox Design Assistant

- Execute multiple independent projects simultaneously on applicable platforms
- Communicate actions and results to other equipment using industrial and IT protocols
- Analyze execution performance with Matrox Profiler utility
- Protect against unwanted changes with Project Change Validator utility

Registered Users

- All registered users eligible for software maintenance, giving access to:
 - Technical support
 - Software updates
 - Matrox Vision Academy online training

Matrox Vision Academy Training

- On-demand training resource for MIL and Matrox Design Assistant
- Categorized instructional videos and courses
- Available to customers with MIL or Matrox Design Assistant maintenance subscriptions
- Also regularly scheduled live classroom training at Matrox Imaging headquarters

vision_academy/](http://www.matrox.com/imaging/vision_academy/)

Smart Cameras

- Fast image sensing, efficient embedded processing, and comprehensive I/O capabilities create an effective all-in-one system
- Rugged IP67-rated design
- Integrated lens focusing and illumination intensity control

3D Profile Sensors

VISION SYSTEMS DESIGN
2020 **Innovators
Awards**

- Dual-camera single-laser design for higher fidelity
- Unique embedded algorithms for added reproduction quality
- Standard GigE Vision for 3D software interface
- Discrete I/Os for synchronizing to external and companion devices
- IP67-rated design
- Award-winning, innovative design

Vision Controllers

- Industrial PCs tailored to machine vision applications
- Direct support for GigE Vision with Power-over-Ethernet or through add-in cards
- Support for USB3 Vision on select models
- Direct support for real-time I/Os or through an add-in card
- Expand connectivity using Matrox Imaging frame grabbers with select models

Frame Grabbers

- Support for SD, HD, non-standard analog, Camera Link, CoaXPress, GigE, DisplayPort, HDMI, and SDI interfaces
- Most comprehensive line-up of high-quality frame grabbers available on the market
- Offload image processing on select boards

I/O Cards

- Add-on communication capabilities that turn any PC running Matrox Imaging software into a genuine vision controller
- Hardware-managed real-time synchronization of vision applications with automation devices

Matrox Professional Services

- Personalized remote or in-person training
- Assessing application or project feasibility
- Demonstrating and/or prototyping applications and projects
- Optimizing and/or troubleshooting user applications and projects, including remote debugging
- Video and camera interfacing

Industry Experience

Matrox Imaging's comprehensive portfolio of hardware and software products provide flexible, modular building blocks that vendors can customize and package into specialized solutions for end-users across a range of industries

>> Automotive Manufacturing

Challenge

- High cost of manual assembly
- Likelihood of human error
- Quality assurance

Solution

- Matrox Imaging smart camera
- Matrox Design Assistant software

>> Food & Beverage Production

Challenge

- Quality assurance at high volume and high speed
- Incorrectly printed data codes

Solution

- Matrox SureDotOCR[®]
- Matrox Indio I/O card
- MIL software

>> Food & Beverage Production

Challenge

- Many types of products, each with different sizes, properties, components
- Code reading of inconsistent inkjet printing

Solution

- Matrox Design Assistant software
- Matrox Imaging vision controller

Electronics Manufacturing

Challenge

- Sorting micro-assembly components
- Items highly sensitive to electrostatic charge
- Quality assurance

Solution

- MIL software

Challenge

- No space for PC-based system
- Likelihood of human error
- Need for automated sensing and control systems in machinery

Solution

- Matrox Design Assistant software
- Matrox Imaging smart camera

>> Packaging

BOSCH

Challenge

- Wide variety of products
- High throughput
- Vision-guided delta robot performing pick-and-place
- Quality assurance

Solution

- MIL software

Pharmaceutical Production

J P S IMAGING LIMITED

Challenge

- Inspection of granules and powders
- Detecting and separating foreign materials from raw materials
- Track-and-trace

Solution

- MIL software
- Matrox Imaging vision controller

Surveillance

Challenge

- Automated verification of machine readable travel documents
- Automated data capture
- Near-perfect accuracy rates

Solution

- MIL software

Transportation

Challenge

- Parking enforcement in large city
- Managing ticketing distribution
- License plate recognition
- Inclement weather impacting readings

Solution

- MIL software
